

Reliability, Versatility, Increased Efficiency. All in one GO.

An alternative to high installation cost and factory down time, the new armored cable options for the GO™ Switch models 72, 74, and 76 cuts cost and improves reliability. Now available with ATEX/IECEx'd' certification, the armored cable provides installation without an additional conduit for mechanical protection. An integral fitting used to seal the switch – cable assembly for IP66 rating, eliminates the need for a cable gland. The broad operating temperature range of -55°C to 100°C provides a dependable solution for very cold temperature applications and is also available with flameproof area classifications.

These models are available with imperial (3/8", 5/8") or metric (M12, M18) threads. All GO Switches can be wired AC or DC, normally open (N/O) or normally closed (N/C), enhancing versatility and requires no power to operate. Other accessories include target magnets, which increase the sensing distance up to 0.5" (12mm).

All GO™ Switches carry the CCC and CE marks for global usage.

ATEX/IECEx Approval Options:

II 2 GD Ex db IIC T6/T4/T3 Gb, Ex tb IIIC T85°C/ T135°C/T200°C Db (-55°C ≤ Ta ≤ 50°C/100°C/100°C), IP66
